

YOUR COMMUNITY HOSPITAL INVESTS IN PATIENT CARE

Providing round the clock, critical care for our patients is our mission. Our caregivers proudly deliver the highest quality, timely care that saves lives every day. But this care requires certain essential "inputs" ranging from investments in EDs and trauma units, disaster preparedness, and hospital staffing, to ensuring access to lifesaving medical equipment & devices, to health IT and hospital infrastructure. Each input is critical and each come with costs that hospitals incur to ensure patients have the care they need, when they need it.

PATIENT CARE

- Emergency 24/7
- Trauma Units
- Specialty Care Units
- Infection Control
- Quality Improvement
- Disaster Preparedness
- Laboratory Services
