The Honorable Brian Fitzpatrick  
U.S. House of Representatives  
271 Cannon House Office Building  
Washington, DC 20515

Dear Congresswoman Sewell and Congressman Fitzpatrick:

On behalf of the Graduate Medical Education (GME) Advocacy Coalition, the nearly 80 undersigned organizations offer our enthusiastic support for the Resident Physician Shortage Reduction Act of 2023 (H.R. 2389). This bipartisan legislation is crucial to expanding the physician workforce and to ensuring that patients across the country are able to access quality care from providers.

The need for physicians continues to grow faster than supply, leading to an estimated shortfall of up to 124,000 primary care and specialty physicians by 2034.<sup>1</sup> America's medical schools, teaching hospitals, and their physician partners are doing their part by investing in physician and health care provider training and leading innovations in new care delivery models that are more efficient and include better use of technologies that improve patient access to care. Even with these efforts, however, shortages and access challenges will persist unless we expand the physician workforce. With demand for physicians continuing to outpace supply as both the patient population and physician workforce continue to age – it is critical now more than ever that Congress build on recent bipartisan efforts and invest in training more doctors.

We are grateful that bipartisan congressional leaders have worked together to provide 1,200 new Medicare-supported GME positions since 2021 – the first such increases in nearly thirty years. The Resident Physician Shortage Reduction Act of 2023 would build on this historic investment by gradually raising the number of Medicare-supported GME positions by 2,000 per year for seven years, for a total of 14,000 new slots. A share of these positions would be targeted to hospitals with diverse needs including hospitals in rural areas, hospitals serving patients from health professional shortage areas (HPSAs), hospitals in states with new medical schools or branch campuses, and hospitals already training over their caps.

We look forward to working together to support the training of future physicians and to secure the passage of this important legislation.

Sincerely,  
Association of American Medical Colleges  
Alliance for Academic Internal Medicine (AAIM)  
Alliance of Specialty Medicine
